Description

The "Binary Calculator" app's purpose is to allow its user to perform addition and subtraction with 2 binary values with values of "0" and "1" and display said result in binary values on the provided screen. The app includes an "+" and an "-" symbol button to indicate which arithmetic operation is to be conducted, and a "=" to later display the value of the arithmetic process at hand. The user can enter a binary value with the "0" and "1" values and choose to add or subtract it with another binary value by selecting "+" and "-" and can display the answer on screen by "=". The app also includes an option to clear the memory of any concurrent arithmetic processes and or values that are stored in memory with an "AC" (All Clear) key.
